Context

60% of home repair workers face inconsistent jobs; 75% of customers struggle to find reliable pros.

Problem Statement

Problem

Finding reliable home repair workers is hard, and skilled technicians struggle for jobs, causing delays, poor service, and low trust.

Impact

Homeowners face delays and poor repairs, workers struggle for steady jobs, and small repair businesses lose visibility and revenue.

Problem Statement/Industry

Problem Being Solved

Many skilled home repair workers like plumbers and carpenters face irregular job opportunities, causing unstable incomes. Customers struggle to find reliable, nearby professionals with verified ratings. Existing platforms limit workers' access, creating barriers and inefficiencies for both workers and customers.

Supporting Data

60% of home repair workers face inconsistent jobs; 75% of customers struggle to find reliable pros.

Problem Analysis

WADHWANI FOUNDATION

Affected Stakeholders

Homeowners and tenants struggle to find reliable repair professionals, leading to delays and poor service. Skilled workers face irregular income and lack of visibility. Housing societies and local repair shops also suffer from unorganized systems, affecting both service quality and job stability.

Impact on Stakeholders

Homeowners face unreliable repairs and safety risks. Skilled workers struggle with irregular jobs and low income. Housing societies waste time managing unorganized requests. Local repair shops lack online reach, losing customers and revenue.

Root Causes

The problem exists because there is no digital platform where all skilled workers like plumbers, carpenters, and electricians can easily register and find jobs. Lack of verified services, poor coordination, and limited access for workers cause delays and low service quality.

Personal/Team Connect

Have you ever waited days to get a plumber or electrician, only to get poor service? We have too, and it’s frustrating. At the same time, we know talented workers around us struggle to find steady work. As a team, we want to change that — by creating a platform that makes home repairs fast, reliable, and fair for both customers and skilled workers.

Target Customer Segments

Primary

Skilled home-repair workers aged 20–45 from urban and semi-urban areas seeking steady jobs.

Secondary

Primary: Skilled home service workers; Secondary: Customers seeking reliable home services

Favourite Offline Gathering Spots: RESTAURANT

Jobs-to-be-Done

Functional JTBD

As a skilled worker, they want to find consistent repair jobs, reach more customers easily, manage bookings efficiently, receive fair payment on time, and build a reputation for quality work—challenges that the unorganized home repair market currently prevents.

Emotional JTBD

They want to feel valued, respected, and secure in their work, confident in their ability to find jobs, proud of their skills, and worry-free about inconsistent income or unreliable clients—emotions the current fragmented repair market fails to provide.

Social JTBD

They want to gain recognition and respect from peers, family, and clients, be seen as a trusted and skilled professional in their community, and feel proud when their work is appreciated—social outcomes currently blocked by the unorganized repair market.

Current Alternatives

Current Alternatives

Currently, they rely on word-of-mouth referrals, local contractors, offline ads, neighborhood networks, and small repair shops to find jobs. Some use social media or WhatsApp groups, but these methods are unreliable, inconsistent, and limit income opportunities.

Gaps in Current Alternatives

Existing solutions are fragmented, unreliable, and informal. Workers struggle with inconsistent job flow, lack of fair payment, no ratings or recognition, limited visibility, and difficulty reaching trustworthy customers—leading to frustration, income instability, and wasted effort.

Macro Analysis

Favourable Trends

AREA	DESCRIPTION
Technology	Digital adoption boosts mobile access, enabling workers to connect with customers easily.
Economy	Gig economy growth increases demand for flexible, verified home-repair job platforms.

Unfavourable Trends

AREA	DESCRIPTION
Legal	New labor and gig regulations may increase compliance costs and limit worker flexibility.
Economy	Rising competition among home-service platforms increases marketing costs and reduces loyalty.

NITI Aayog Report on Gig Economy 2023; Statista Home Services Market India 2023; Economic Times Home Services Sector Insights 2023; India Brand Equity Foundation (IBEF) 2023

Back-of-the-Envelope Financial Projections

Currency: Indian Rupee (INR)

Chosen Business Model: Marketplace

AREA	YEAR 1	YEAR 2	YEAR 3
Revenues	45000	90000	144000
Total Expenses	70000	80000	96000
Profit	25000	10000	48000

Prototype

Prototype Format

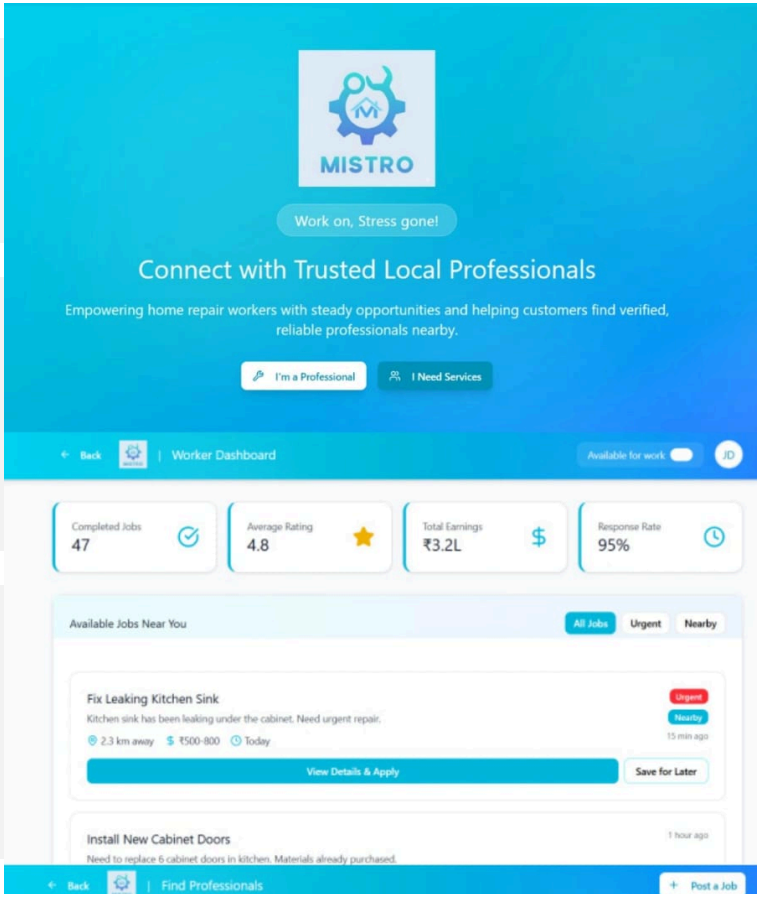

A digital prototype of the Mistro app demonstrating its features and user interactions.

Functionality included in the Prototype

The prototype will showcase user login, worker signup, service search and booking, real-time job notifications, ratings and reviews, secure payment flow, and dashboards for both workers and customers

Functionality NOT included in the Prototype

The prototype will exclude advanced analytics, live GPS tracking, in-app chat support, full payment integration, and partner company collaboration features.

Prototype Validation

Number of users engaged with?	How many people liked or loved the prototype?	How many people were either neutral or mostly unhappy with the prototype?
15	12	3

Prototype Feedback

What aspects of the prototype did the users LOVE?

Users loved the simple and clean interface, easy job booking process, and quick worker-customer matching. They appreciated the secure payment option, real-time notifications, and transparent rating system, which made the overall experience convenient, reliable, and user-friendly.

What aspects of the prototype were DISLIKED by the users?

Some users felt the prototype lacked real-time chat support and detailed worker profiles. A few found the navigation between booking and payment screens slightly confusing and suggested adding clearer instructions and faster response features for a smoother user experience.

Competition Analysis

COMPETITOR NAME	TYPE	STRENGTHS	WEAKNESSES
Urban Company	Direct	Trusted, high quality	High commission, limited access
Just Dial	Indirect	Wide reach, affordable listings	Unverified data, outdated interface
TaskRabbit	Direct	Trusted, global reach	High fees, limited regions
Thumbtack	Indirect	Smart matching, verified pros	Limited reach, complex setup

Our Product/Service will be better than the competitors' solutions because:

Mistro offers multi-platform job access for workers, real-time verified bookings for customers, low service fees, and regional language support to enhance inclusivity and income stability.

Lean Canvas

WADHWANI FOUNDATION

Problem
Finding reliable home repair workers is hard, and skilled technicians struggle for jobs, causing delays, poor service, and low trust.

Solution
Mistro – A mobile platform connecting skilled home-repair workers with verified customers, offering job matching, secure payments, scheduling, and ratings for reliable, high-quality service.

Key Metric
We track active users, bookings completed, worker retention, customer satisfaction, and repeat usage.

Unique value Proposition
Mistro empowers skilled workers and connects users with verified services—fast, fair, and reliable.

Unfair Advantage
MISTRO's worker-first model, local focus, and verified profiles make it difficult for competitors to copy.

Channels
MISTRO is delivered through a mobile app, a website, and partnerships with local service organizations.

Customer Segment
Skilled home-repair workers aged 20–45 from urban and semi-urban areas seeking steady jobs.,Primary: Skilled home service workers; Secondary: Customers seeking reliable home services

Cost Structure
Major costs include platform development, cloud hosting, marketing, worker onboarding, and customer support.

Revenue Streams
Commission Model, Pay-per-Use Model

Go-to-Market Approach

Venture Viability Assessment

Venture Viability Index

95.55%

Strengths

Our venture shows strong viability due to a large, growing service industry, high team capability, and a clear understanding of customer pain points. A differentiated value proposition, realistic financial projections, and strong team commitment also support sustainable long-term growth.

Areas of Improvement

We need to strengthen our marketing strategy to accelerate early customer acquisition and refine our revenue model for greater scalability. Improving customer research depth and enhancing competitive differentiation will further increase our venture’s resilience and long-term success.

Next Steps

Venture Summary

OVERVIEW

We at Mistro are committed to transforming the home-services ecosystem by empowering skilled workers and ensuring households receive reliable, verified, and timely help. We are building a digital platform that connects plumbers, electricians, and carpenters with customers instantly, ensuring fair income, transparency, and trust. While still in development, our vision is to uplift worker livelihoods and deliver dependable services to every home.

Mission

Our mission is to empower skilled home-service workers with fair, reliable income opportunities while providing customers with trustworthy, quick, and quality services. We aim to build a transparent, accessible platform that improves livelihoods and delivers dependable home repair solutions for every household.

Social/Economic Relevance

Millions of skilled workers struggle with unstable jobs and low income, while households face delays and safety issues due to unreliable service options. Solving this gap builds economic stability, promotes dignity for workers, and ensures families get safe, verified, and timely home services—strengthening communities overall.

WADHWANI FOUNDATION

Thank You!

Our mission is to empower skilled home-service workers with fair, reliable income opportunities while providing customers with trustworthy, quick, and quality services. We aim to build a transparent, accessible platform that improves livelihoods and delivers dependable home repair solutions for every household.
